All good deeds done to man, When first our work began, e lie behind, forgotton and remote; In clear Nirvana's day

They melt and pass away;— ounts the atoms that in sunshine float

As when in ocean's waye
The rain-drop fluts a grave,
try no more the storm-wind or the heat,
to shall the cleansed soul
Plungs in the 1 oundless whole,
seeking freedem, into noughi retreat.

For dreary were the range Through Being's endless change, Base forms of bruke, or lower briths of man; What profit have so found, It was colusions drowned, To end at last as poor as we began—

Still weary war to wage Against disease and age, I limbs, dim eyes, weak brain and Through each new type of life, To know the same vain atric, taste a thousand times the bitterness

Pot, O, the rapture deep Of that entrained sleep, n wi dom's self has 'numbed the thric -bleat soul, When every sound is hushed And o'er each sense have rushed mighty waves that from Nirvana roll!

Far better be as nought
Than live thus overwrought,
stred, and mocked, and captive led, and blind;
Far better nothingness
Far has it this sore distress,
re brute, dull matter triumphs over mind.

And is this, then, the end? And does our bliss depend mowing that we are not what we seem? Is there no deeper joy That nothing can destroy— ep in which we dream not that we dream?

Is this, for all who live,
The best boon Heaven can give,
To enter on the drear and darksome night;
To feel the boundless void,
Where being lies destroyed,
And self is lost in nothing infinite?

Were it not better far
To know not that we are,
so the very sense of being's pain,
Than still to watch the spark
Of life through all the dark,
tremble leet it burst in flames agai

Among the chief points of excellence of the Chicksring Planos, of which speak the renowned artists in their congratuatory testimoulist to the Mesers. Chickering, are the greatest possible depth, richness and volume of tone, combined with a rare brilliancy, clearness and perfect evenness throughout the entire scale; and, above ait, a surprising duration of sound, the pure and sympathstic quality of which never changes under the most delicate or powerful touch.

During the past forty-three years this firm has mand-scured

BC,000 PLANOS.

In the construction of which they have introduced ex known and valuable improvement. They have inva-bly been selected and used by all of the world's knowledged great artists who have valuable this com-professionally, both for private and public use.

I consider Chickering & Sons' Pianos, beyond com-parison, the best I have ever seen in America.

GOTTECHALK.

I consider Chickering & Sons' Pianos superior to any in the world.

They are unrivalled for their singing qualities and for the harmonious roundness of their tone. There is a perfect homogeneity throughout all the registers. The upper notes are remarkable for a clearness and purity which I do not find in any other instrument, while the base is distinguished for power without harshness, and for a magnificent sonority.

Tour Pianos are superior to any I have ever seen in this country or in Europe.

I have never heard a tone so perfect; it yields every expression that is needed in Eustic, and its quality is capable of change to most every sentiment. This is a rare power, and is derived from the perfect purity of its tone, together with its sympathetic, classic and well balanced touch.

POZNAMBKI.

It may be satisfactory to our patrons and friends among the publicat large to state that testimonials have been received from all the leading artists who have visited or are now residing in the United Sistes, a few of whose names, besides those above, we append: LEO. DR MEYER.

During the past eight years I have constantly played upon the justly celebrated Envel Planos; yours are the only instruments that I have sound, either have or in Europe, to equal them in all their points of excellence.

WARE-ROOMS,

THE SALE OF THE PLANTATION BIT-TERS is without precedent in the history of the world. There is no secret in the matter. They are at once the most speedy, strengthening health-restorer ever discovered, it requires but a single trial to understand this. Their purity can always be relied upon. They are composed of the celebrated Callsays Bark, Cascarlla Bark, Dandellon, Chamomile Flowers, Lavender Flowers, Wintergreen, Asias, Cloverbuds, Orange-peel, Snake-root, Caraway, Corlander, Burdock, Having played upon a Piano-forte made by Mesara, Chickering & Sons, of Boston and New York, I have much pleasure in testifying to its general excellence. For sweetness and brilliancy of tone, delicacy of touch and magnificent power for concert purposes, I consider it a really Grand Piano-roure, and decomposity the next I have seen of American Manuscauses, ARABELLA GODDARD, [GIDLO REGONDL.] They are especially recommended to clergymen, pub-if capeakers, and persons of literary habits and seden-tary life, who require free digestion, a reliab for food, Delicate females and weak persons are certain to find
